

Open  
College  
of the Arts

**UNIVERSITY FOR THE CREATIVE ARTS**

**PROGRAMME SPECIFICATION FOR:**

**BA (HONS) CREATIVE ARTS**

**PROGRAMME SPECIFICATION [ACADEMIC YEAR 2022/23]**

This Programme Specification is designed for prospective students, current students, academic staff and potential employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the teaching, learning and assessment methods, learning outcomes and content of each unit can be found in the Unit Descriptors.

Section A – Material Course Information

Validating Body	University for the Creative Arts <sup>1</sup>		
Teaching Body	OCA – Open College of the Arts		
Final Award Title and Type	BA (Hons)		
Course Title	Creative Arts		
Course Location and Length	Campus: OCA/Open and Flexible Learning	Length: Maximum time allowed to complete the programme is 12 years	
Mode of Study	Full-time		Part-time <input checked="" type="checkbox"/>
Period of Validation	2021/22 – 2025/26		
Name of Professional, Statutory or Regulatory Body	Not Applicable		
Type of Accreditation	Not Applicable		
Accreditation due for renewal	Not Applicable		
Entry criteria and requirements <sup>2</sup>			
<p>Level 4 courses are open access so no prior qualifications are required. In order to progress to Level 5, students must have gained 120 credits at Level 4, through study or by Accreditation of Prior Learning.</p> <p>In addition to prior qualifications and learning accreditation, OCA specifies three general requirements for students to be admitted to its degree programmes:</p> <ul style="list-style-type: none"> <li>● English language competency;</li> <li>● access to a desktop computer or laptop with internet access*;</li> <li>● the ability to easily manage a range of basic functions through ICT (information and communications technology)</li> </ul> <p>Full details on each of these requirements can be found in the OCA Student Regulations in the section Admission Requirements.</p> <p>Students must also be aware of network etiquette and security considerations when using email and the internet. There is a section in OCA's Student Regulations about online etiquette. In addition, there is a Data Protection and Confidentiality Policy appended to the Student Regulations. OCA takes these issues seriously. Data protection rules form part of OCA's Conditions of Enrolment. In addition to the information located in our student documentation OCA is developing short videos to explain netiquette and online security.</p> <p>An unaccredited OCA Foundation Certificate is available for students who need to develop their technical and visual awareness skills before embarking on degree study.</p> <p><i>*This requirement may waived, on rare occasions, by the Head of Learner Support if negotiated prior to the start of the course. Typically, exemptions are only given to students with specific disabilities or to those studying in prison. Specific requirements</i></p> <p>In addition to meeting the admission requirements for all courses, students should ensure they understand the nature of the challenges and requirements of the course they are enrolling on, as outlined on the OCA website.</p> <p><i>Disabled students</i></p> <p>Applications from students with disabilities are considered using the same criteria and principles as all other applicants. All students with a disability are encouraged to indicate this on their application form in order that advice can be offered on the facilities and services available. Prospective students with a disability will be encouraged to discuss their requirements with the Head of Learner Support.</p>			

<sup>1</sup> Regulated by the Office for Students

<sup>2</sup> This should be the standard University Criteria unless otherwise approved by the Academic Board and include UCAS entry profile for undergraduate courses.

### Maximum period of registration

The maximum period of registration for the course is 12 years.

### UCAS entry profile:

## Section B - Course Overview

Creative Arts is a broad, practice-based course that encompasses a wide variety of visual and non-visual disciplines for students to select as part of their tailor-made creative journey. The course offers students a choice of relevant subjects and through regular tutor support builds these into the learning structure, with a view towards broader engagement with the arts. Students can develop their skills across the five discipline areas of Art, Creative Writing, Design, Lens Based Media and Music through access to the dedicated Skills Hub. The course is not just interdisciplinary in terms of working methods, but also in the way it engages students with ideas in the wider world and applies these ideas to a creative practice made up of two or more disciplines.

Students will build their creative studies through a selection of discipline content that has meaning for them. Their choices begin at Stage 1 and continue to grow as their studies progress. Students must develop their creative practice across more than one discipline to engage practically in their interdisciplinary studies. Students will focus their practice towards the end of the course, refining their distinct creative language made up of two or more disciplines alongside their critical understanding of their ideas.

This interdisciplinary course is structured to deliver a broad array of content and provide opportunities for both personal and professional development in students choice of disciplines. Subjects will address key themes that underpin a broader cultural perspective of the world and an understanding of the importance of time and place. Students individual practices will develop out of the connections they form between the subjects covered and their practical work from their distinct chosen disciplines. The three stages of study provide a framework for pacing the content, affording regular points of contact with their tutor to guide their learning and assist in their choices.

The creative arts degree is designed for students who wish to fulfil their ambitions for a diverse practical and critical engagement with the arts and understand how their unique creative voice situates itself within contemporary practice and the broader cultural world.

### Stage 1: Experiencing the Creative Arts

At Stage 1, students encounter the term interdisciplinarity to understand what it means and how they will apply it to their studies. Subjects explored include time, place, global and cross-cultural perspectives, and how to use research from within and outside of the arts to apply to their practical work. Students also test and experiment with skills through access to a dedicated Skills Hub from a range of disciplines before developing their distinct creative language. Stage 1 students have the opportunity to show their work online as part of an end of stage peer-reviewed presentation that forms a bridge to their studies at stage 2.

### Stage 2: Understanding Relations and Perspectives

At Stage 2, students develop their understanding through interdisciplinary thinking. We encourage an emphasis on finding their distinct creative voice through developing their practical work across disciplines. A furthering of research of their perspective on the world and how they form relations to subjects that interest them is crucial to their development. Students test their interdisciplinary creative language and are encouraged to take risks in preparation for Stage 3.

### **Stage 3: Advancing your interdisciplinary practice**

Stage 3 units provide students with a breadth of intellectual, practical and transferable skills required for a range of roles in the creative arts. The level requires students to answer key questions defining the nature of their interdisciplinary practice, articulating their ideas, researching the theory and applying it to their creative work.

Students are encouraged to progress their studies, and the course provides them with the opportunity to collaborate online, present their work as they establish external projects for further application of their interdisciplinary studies in either a professional or personal context.

### **Section C - Course Aims**

1. To widen access to education in the creative arts at undergraduate level through Open and Flexible Learning.
2. To provide an intellectually stimulating interdisciplinary programme based on high quality study and tutor support.
3. To develop student's creative capacities and their ability to synthesise, reflect, respond and apply findings.
4. To encourage individual, creative responses to ideas through the development of a choice of practical skills.
5. To develop an understanding of the creative arts and its broader application in the wider world.
6. To develop a critical understanding of key themes and topics relevant to interdisciplinary study and the social, historical, global and cross-cultural context in which it is practised.
7. To provide an environment in which the student has the possibility of changing their view of the world and their interaction with it both creatively and intellectually.
8. To foster high-level ethical and professional standards and an awareness of the possibilities offered by existing and new developments in areas of the creative arts to expand their areas of application.
9. To develop autonomous learners capable of applying intellectual and practical skills in a chosen area of contemporary creative arts activity appropriate to employment, further study, or life-long learning

### **Section D - Course Outcomes**

Upon successful completion of the course students are able to:

#### Knowledge

- LO1 Demonstrate knowledge of appropriate methodologies, critical contexts and debates to locate own work and ideas
- LO2 Demonstrate knowledge of interdisciplinary practice and thinking specific to own choices of subjects and the way they connect to wider contexts

#### Understanding

- LO3 Demonstrate a critical understanding of the knowledge acquired through analysis, reflection and testing of ideas.
- LO4 Employ an understanding through undertaking research connecting to choice of subjects and disciplines.
- LO5 Develop an individual creative language and creative response to themes in the wider world.

#### Application

- LO6 Demonstrate application of key concepts through a breadth of inventiveness, ideas generation and skills in the production of creative work.
- LO7 Demonstrate application of interdisciplinary skills through a comprehensive range of creative practices and techniques, demonstrate analysis and creative thinking, interpreting and responding to self-initiated projects.
- LO8 Communicate information and justify creative work convincingly to the creative industries and non-specialist audiences.

## Section E - Learning, Teaching and Assessment

### Learning and Teaching Strategy

The Open College of the Arts (OCA) strategic vision is “to be at the forefront of student-led creative arts education through open, enhanced, & supported distance learning, for an evolving society”. OCA is a non-profit educational charity, whose purpose is to widen participation in arts education through open flexible distance and online learning.

OCA uses a learning design process to consider the content, activities, and support needed to deliver course aims. This flexible approach recognises and supports a diverse range of student experiences, ambitions, and needs. In line with OCA’s core values, it also considers how to encourage more open, empowering, engaging, social, sustainable and evolving approaches to learning, teaching, and assessment.

As distance learners, students will need to work independently and to develop appropriate research and study skills. An induction programme and ‘Getting Started’ introductions are in place to support students to do this, and to help establish relationships with peers and tutors. Ongoing study skills support is available through #weareoca, OCA’s blog content, and other cross-curriculum study skills resources.

OCA’s virtual learning environment, OCA Learn, provides a platform for content, activities, and support for each unit. A dedicated Degree Space is in place to foster course wide dialogue and peer support through forum activities and shared resources. OCA has a responsibility to ensure all learning environments, content, and communication are as accessible as possible for individuals who have sensory, cognitive, neurological, physical, or other disabilities, and to provide an inclusive learning environment that acknowledges the diversity of our students’ experiences. OCA’s Student Engagement Strategy places a key focus on accessibility, with provision for designing learning materials with enhanced operability for mobile devices, which conform to all appropriate accessibility standards.

Course content is delivered through a range of learning materials, including written, video, and interactive media. These materials provide introductions and framing of subject related content, technical guidance, case studies, and other appropriate information. Materials are primarily accessed through OCA Learn, as well as #weareoca, which provides opportunities for current tutor and student-led content and debate.

Accompanying activities, such as exercises, research tasks, and assignments, encourage students to work independently and flexibly by selecting, testing, and interpreting relevant research, and applying understanding of critical thinking and creativity. Through these activities, students will begin to identify, develop and manage their own projects and document their progress through a learning log, or similar format. Learning logs are provided through OCA Spaces.

Students are expected to have a basic grasp of any software required for their course and to learn more complex usage as necessary as they progress. OCA provides students with G Drive online storage which includes word processing, presentation, drawing, and mind mapping tools. While OCA does not provide a help desk service to students for software, learning activities provide structured context for software learning at staged points throughout the course, and forums provide opportunities for peer support.

Learning is supported by tutors who provide timely, well-grounded and constructive formative feedback that aims to stretch and challenge learners at staged points within the unit. In parallel, tutor and student-led learning takes place through online group work. Group work offers opportunities to discuss and shape ideas, and share and support approaches to learning within video, webinar, study events, and/or forum activities and support. Critically reflecting on work through self-evaluation provides a valuable way for students to observe and learn from peers, to develop increasingly professional personal and graduate skills, and to develop a deepening recognition of subject boundaries. Students are encouraged to do this through their learning log, reflective assessment presentations, and by reflecting on formative feedback.

Student Services provide study planning and pastoral support for any student who requests it. This is available personally via telephone, online, or within student forums, or more generally through additional resources, signposted through OCA Learn and/or #weareoca.

Students will engage with a range of academic literature throughout the course, supported through library access and seminars. Essential and recommended reading lists have been selected for their academic currency, and from authors and practitioners across a range of viewpoints, ethnicities, identities, and cultures. All reading lists can be accessed through the digital library services and eBooks. Additional online texts and journals are also available via UCA’s online library. Students are supported through OCA’s Link Librarian via OCA Learn and #weareoca content and debate.

As students progress, their research will become more self-directed. Independent research and projects will be undertaken alongside a consideration of any ethical issues. Guidance, resources, and support for any external and/or collaborative projects are available through the Enterprise Hub and in discussion with tutors.

In addition to OCA's core support, OCA's Student Association (OCASA) provides opportunities for students to physically engage with cross-curriculum Study Events, asynchronous Virtual Study Events, or to become involved in wider student discussions or other events.

### Assessment Strategy

OCA's assessment strategy is based on an assessment for learning model which emphasises assessment *for* learning rather than assessment *of* learning. Therefore, assessment is seen as an integrated and meaningful part of the learning journey. Assessment outcomes encourage learners to critically reflect on their progress and to articulate ideas and outcomes effectively through appropriate presentation formats.

Assessment criteria focus on the extent to which knowledge of relevant concepts, practices, theories, and contexts are demonstrated, the level of understanding demonstrated through the testing and application of knowledge, and the degree to which knowledge and understanding are demonstrated through the application of technical, communication, personal, transferable, and graduate skills. To help articulate these, assessment criteria are presented at each level through a set of range statements.

Summative assessment can take place online or at a physical assessment event. Students will submit work in line with course assessment guidelines, and will be assessed through group marking overseen by the Programme Leader. Quality assurance is provided through moderation of marks, internal verification of the assessment process, parity checks to ensure grades are consistent across OCA, plagiarism checks, and scrutiny by External Examiners. Students will be provided with summative marks and feedback at the end of each unit.

### Costs of additional materials/resources

#### Software and digital equipment

As part of some units, students are required to use specialist applications. Students are responsible for sourcing and, where necessary, purchasing any additional software specified. Where possible, open or freeware equivalents will be discussed alongside industry standard options. Students are eligible for any student discounts on computer equipment and software.

#### Materials and resources

Students are responsible for sourcing and purchasing the materials, resources, and any additional equipment used in the production of their work. These costs will differ from student to student, depending on each student's area of focus.

#### Transportation of work

Students are responsible for any postage costs of work to/from tutors or OCA for formative feedback and/or assessment. OCA will charge students for any excess postage payable on work submitted for formal assessment which exceeds the maximum permitted weight. Alternatively, students can submit work digitally for free.

#### Learner Support Scheme

In line with OCA's Access and Participation Plan, the College continues to invest in schemes to improve engagement into creative arts from those from low socio-economic backgrounds through a bursary fund. For further details on your specific course costs, please visit [www.oca.ac.uk](http://www.oca.ac.uk).

## Section F - Employability

OCA recognises that its current student body holds a broad range of employment and enterprise aspirations. Many students have established careers, see their studies as a change in direction, and for an increasing number of younger students, as a first step into a creative career. As distance learners, OCA students are located across the UK and internationally and consequently have differing levels of resources and opportunity. In order to provide meaningful and consistent educational experiences and outcomes for all of these students, OCA encourages students to interpret the concept of 'enterprise' in ways that are personally relevant to their particular aspirations, social contexts, and locations.

As a charity, OCA supports a curriculum that has a positive impact upon people's lives and society as a whole, and encourages engagement with enterprise that has a clear societal impact. This means undertaking external projects that can have a wider social benefit, and developing practices that are socially aware and environmentally sustainable.

To encourage this, learning materials and activities provides a framework for students to begin to define, establish and sustain their practices at a variety of scales and ambitions, and encourage students to think about freelance, employment, social enterprises, or entrepreneurship outcomes. A focus on research and ethics helps to frame these activities within wider social contexts. Students are also encouraged to undertake collaborative projects with other students, and to work on competition briefs or other external opportunities.

A key benefit of distance learning is in allowing self-sustaining ways of developing a creative practice to build over time, and by balancing study/work/life commitments. Students can establish studio spaces and build resources throughout their studies, to feel prepared and equipped at the end of their course. Therefore, enterprise related themes are embedded through the course to encourage this sustainable approach.

An Enterprise Hub will provide a central online resource to support self-directed student activities. The Hub will provide guidance and resources on key enterprise themes, such as establishing and undertaking external projects/work-related learning, working collaboratively, establishing business or enterprise opportunities such as external exhibitions, business plans, or social enterprises, and connecting to appropriate professional networks.

OCA will use the Enterprise Hub to help establish relationships with other organisations, businesses, and funding opportunities. These in turn will provide the potential for business incubators, mentoring options, internship opportunities and enable access to seed-funding for students.

## Section G - Enhancing the Quality of Learning and Teaching

The course is subject to the University's rigorous quality assurance procedures which involve subject specialist and internal peer review of the course at periodic intervals, normally of 5 years. This process ensures that the course engages with the applicable national Subject Benchmarks and references the Framework for Higher Education Qualifications.

All courses are monitored on an annual basis where consideration is given to:

- External Examiner's Reports
- Key statistics including data on retention and achievement
- Results of the Student Satisfaction Surveys
- Feedback from Student Course Representatives
